COMP365: AI and Machine Learning

Source Document: **Simple_Syllabus_COMP365.pdf** | Topic Source: **Student Learning Objectives/Outcomes (SLO)**

Course Prerequisites:	COMP285	**Curriculum Horizon:**	15 Weeks
Weekly Study Budget:	6 hours/week	**Prereq Inversion Rate (PIR):**	**0.00%** (0 inversions)
Workload Std Dev:	2.10 hours	**Date Range:**	N/A to N/A

Weekly Topological Study Schedule

Week	Allocated Topic / Study Concept	Hours	Source Class Date
W01	**COMP365_T01**: Explain foundational concepts in artificial intelligence and machine learning.	3h	N/A
W01	**COMP365_T02**: Apply search and reasoning methods to solve computational problems.	3h	N/A
W02	**COMP365_T03**: Build and evaluate machine learning models using appropriate data and methods.	3h	N/A
W02	**COMP365_T04**: Develop software that applies modern AI techniques.	3h	N/A
W03	**COMP365_T05**: Communicate and evaluate AI solutions through individual and team-based work.	3h	N/A

Planning Notes & Assumptions

- Study effort defaults to 3 hours per item unless explicitly stated.
- Dependency edges infer source order; the syllabus does not specify topic prerequisites.
- No dated course outline was found; this is a suggested outcome-based study plan over an assumed 15-week horizon, not the instructor's calendar.
